

Service Solution

IMESA SERVICE NOT A DEPARTMENT, BUT AN ATTITUDE

IMESA SERVICE SOLUTIONS

IMESA has been working in the field of electromechanical construction for almost 50 years. Over the past five decades has not only improved the range and reliability of its products, but also developed tailored service solutions for complex situations that customers have to handle in daily operations.

Both experience and expertise are embedded in Imesa's service portfolio – a portfolio that is designed to meet all customer requirements and to ensure that a plant operates at peak productivity and cost efficiency. Our comprehensive portfolio ranges from long-term service agreements to individual service products like spare parts, training, engineering and consulting.

Understanding and prioritizing our Customers' need first and providing the most technically knowledgeable staff to solve any electrical needs; all of this is done maintaining to the quality workmanship, skilled technicians and engineers that place customer satisfaction above all.

MAINTENANCE AND RETROFIT

Minimizing the risk of unscheduled breakdowns, Imesa offers retrofit solutions and predictive maintenance in order to extend the lifecycle of the apparatus and optimizing its performances.

CORE OF THE PLANT

Being the electrical switchboard the most important link between power generation and distribution, its performance level become a key factor for the entire electrical plant.

IMESA AS PARTNER

Imesa and its Service Centers located in strategical areas all over the world are the right partners for the most demanding Customers who need dedicated solutions in a very tight schedule.
